

LÖSOMAT Side Power Wrench for plate heat exchangers

850 - 4.800 N·m

## Specially developed for working on plate heat exchangers

LÖSOMAT has specially developed various series of side power wrenches in this sector for the safe assembly and disassembly of plate heat exchanger systems.

They work rapidly and reliably, and are – like all LÖSOMAT devices – weight-optimised and designed to be user-friendly.

Regardless of whether your exchanger sys-

tems are equipped with or without thrust bearings, LÖSOMAT has the appropriate system for all types to make your work as easy and comfortable as possible.

The LÖSOMAT side power wrenches are available with electric or pneumatic drives.
