

FTS

Power tool test and automatic wrench test

Benefits

- Two benches, FTY and AWT, in one product → costs saving and quality assurance all in one
- Improved productivity, with all functions in a single product
- Customizable, modular bench
- Flexibility, with automatic and manual test
- Easy to service
- Reproduce real joint behavior for testing power tool in real conditions (position-based resp. joint-related MCT according VDI/VDE 2645-2:2014)
- Time saving with automatic wrench test
- Fastest bench on the market: Cm/Cmk with 50 samples in less than 3 minutes
- Conform to ISO 6789: 2017

Features

- Hydraulic brakes for tool test
- Motorized transducer for automatic wrench test
- Autodetection of the wrench click point
- New reaction bar with position sensor → target torque check in respect to wrench length → improved safety
